

Brand guidelines

Logo, colour, type, components and the Tailwind setup.

The mark

The envelope-T sits inside a chat bubble: every email Taddar sends is the start of a conversation. The coral dot is the reply notification, and it is the only place coral appears in the logo.

ANATOMY

● Bubble

Ultraviolet #3423A6. Rounded at 24% of the icon's width. The tail points bottom-left, always.

● Envelope-T

White in the full-colour mark. The flap and seam form the T of Taddar.

● Reply dot

Coral #FF6B5B. Overlaps the top-right corner. Never recolour it or move it.

● Wordmark

Inter SemiBold, lowercase, tracked -4.7%. Supplied outlined, so never retype it.

WHICH FILE TO USE

Website header, docs, decks
Dark or ultraviolet backgrounds
One-colour print, embossing, butter backgrounds
App icon, social avatar, anywhere square
Browser tab (16-48px)

taddar-lockup.svg
taddar-lockup-reversed.svg
taddar-lockup-mono-night.svg / -mono-white.svg
taddar-icon.svg
favicon.ico / taddar-favicon.svg

Space, size and backgrounds

Give the logo room. The clear space unit is x, the width of the reply dot. Keep at least 1x clear on every side of the lockup and icon.

CLEAR SPACE · X = WIDTH OF THE REPLY DOT

Lockup: 96px / 25mm wide

Icon: 24px / 6mm

Below 32px: favicon

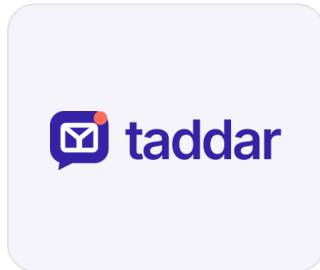

The favicon version drops the T seam and uses a solid envelope so it stays legible in a browser tab. Don't use it above 48px.

Mid-tones · mono white

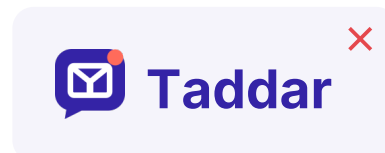

DON'T

Recolour the bubble

Change the dot colour

Retype the wordmark

Stretch or squash

Use full colour on busy mid-tones

Core palette

Ultraviolet leads. Ink and Cloud do the quiet work. Coral and Butter are seasoning: small, deliberate, and never the background of a whole section.

Ultraviolet PRIMARY #3423A6 RGB 52 35 166	Coral SIGNAL #FF6B5B RGB 255 107 91	Butter HIGHLIGHT #FFD66B RGB 255 214 107	Ink TEXT / DARK #1A1633 RGB 26 22 51	Cloud SURFACE #F5F4FB RGB 245 244 251
Logo, primary buttons, links, headings on light.	The reply dot, secondary CTAs, notifications. Ink text only.	Badges, highlights, illustration. Never used as text.	Body text, dark mode background.	Page and card backgrounds.

PROPORTION • ROUGHLY HOW MUCH OF A LAYOUT EACH COLOUR SHOULD COVER

THREE RULES

- 1 White text never goes on Coral or Butter. Use Ink #1A1633 (6.2:1 on Coral, 12.5:1 on Butter).
- 2 Coral as text on white must be coral-700 #B8473C (5.2:1). The logo's coral dot is decoration, not text.
- 3 One accent per view. Coral and Butter side by side at large sizes fight each other.

Full scales

Each brand colour has an 11-step scale for UI states, charts and tints. Anchors are marked. These map 1:1 to the Tailwind classes, e.g. bg-uv-700 or text-coral-700.

	50	100	200	300	400	500	600	700	800	900	950
Ultraviolet uv	1.1 F5F6FF	1.2 E6EAFB	1.4 CDD5FF	1.9 AEB8FF	2.7 8C96ED	4.1 6C73DA	6.4 4F4FC7	10.8 3423A6	13.5 271B81	16.3 1B0B67	18.6 10014B
Coral coral	1.1 FFF4F2	1.2 FFE7E3	1.4 FED0C9	1.7 FEB3A8	2.2 FC9384	2.8 FF6B5B	3.8 DD5749	5.2 B8473C	7.6 91362D	10.5 6F2820	15.0 481611
Butter butter	1.0 FFFAED	1.1 FFF3D5	1.2 FFE6A7	1.4 FFD66B	1.6 EEC65C	2.0 D7B353	2.9 B39545	4.5 8C7436	6.8 6B5929	10.0 4E411D	14.6 312811
Ink ink	1.1 F5F4FB	1.2 EAEAF4	1.4 DAD9E5	1.8 C0BFCC	2.7 9D9CAC	4.3 797889	6.5 5C5C6F	9.3 474559	12.3 343347	15.1 252438	17.4 1A1633

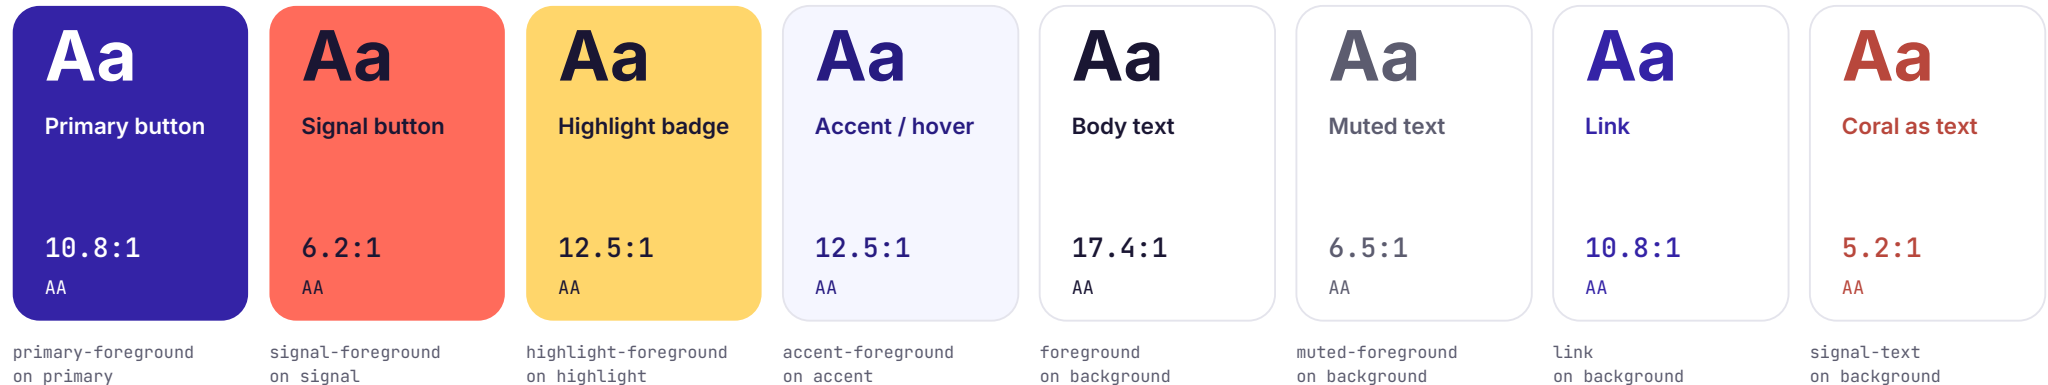

Top-left number = contrast against white. 4.5+ passes WCAG AA for body text; 3.0+ passes for large text (24px+, or 18.5px+ bold).

● = brand anchor colour

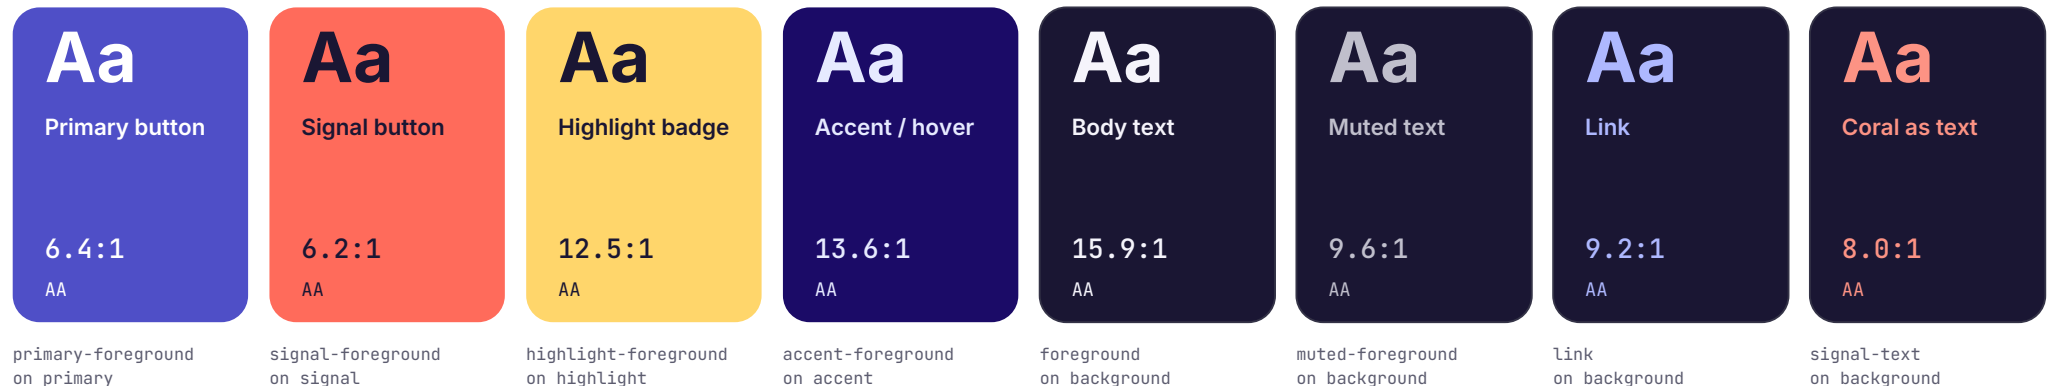

Accessible pairings

Every semantic pair in the Tailwind theme passes WCAG AA (4.5:1) in both light and dark mode. The ratios below are calculated, not estimated.

LIGHT MODE

DARK MODE

Inter + JetBrains Mono

One family keeps it fast and clean. Inter for everything; JetBrains Mono only for stats, code and data. Both are free on Google Fonts. Headlines are tight (negative tracking), body text is left at default.

display	64px / 68px
h1	48px / 54px
h2	36px / 42px
h3	24px / 32px
h4	20px / 28px
body-lg	18px / 28px
body	16px / 24px
small	14px / 20px
caption	12px / 16px

SIZES SHOWN AT 72% SO THE SCALE FITS THE PAGE. REAL VALUES ARE IN THE LEFT COLUMN AND THE TAILWIND THEME.

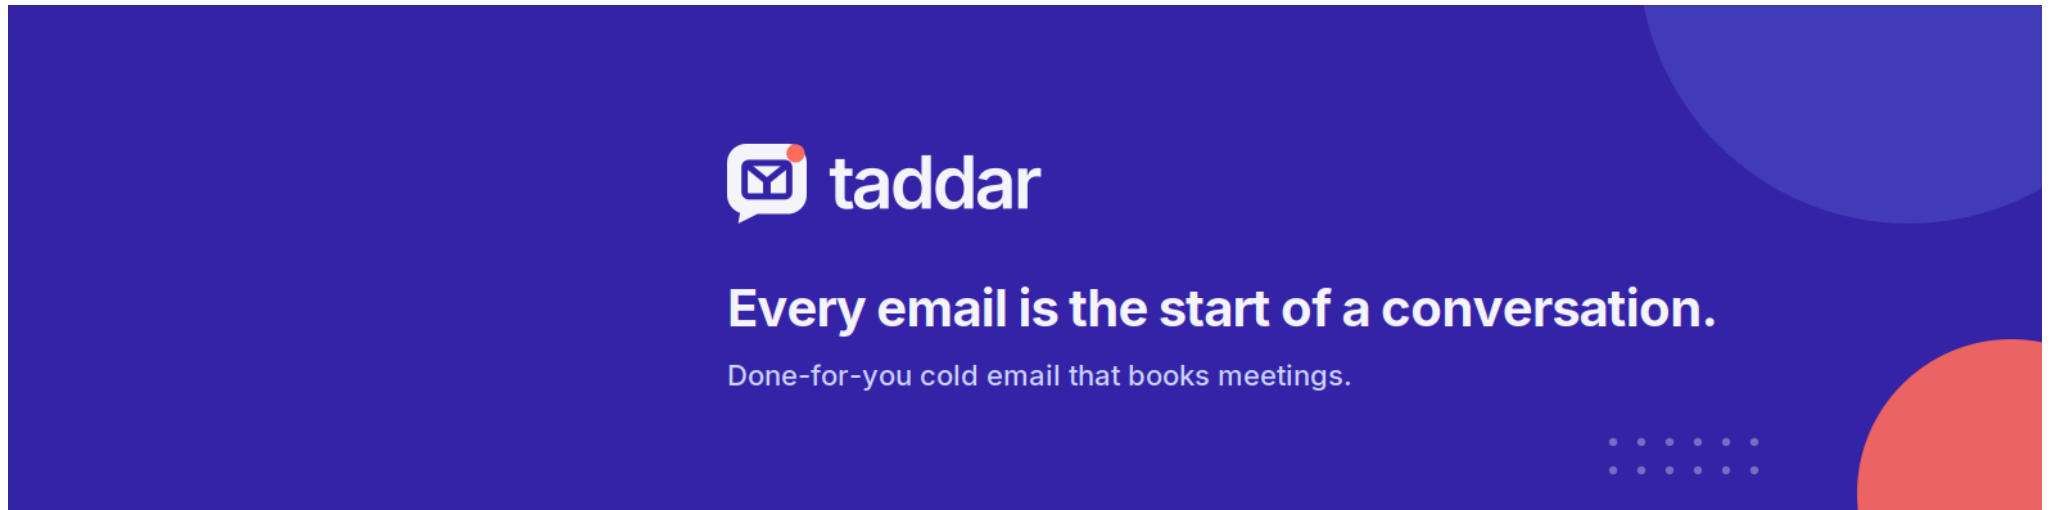

Components

Pill buttons, soft ultraviolet-tinted shadows and 16px card corners. These match the btn-primary, btn-signal, btn-ghost and badge-highlight classes in taddar.css.

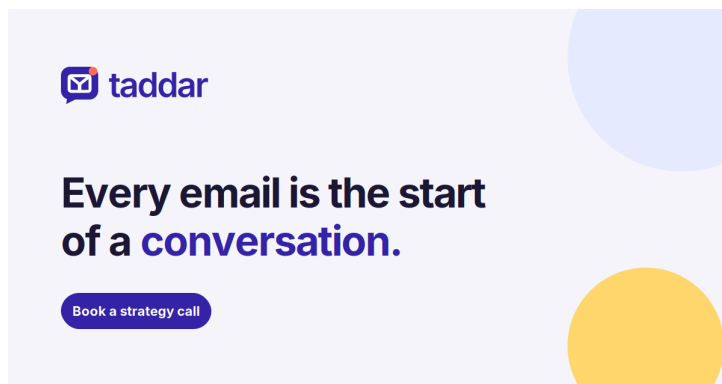

All files are in /social and /email. Host the logo PNG on your domain before using the signature; email clients block SVG and many block base64 images.

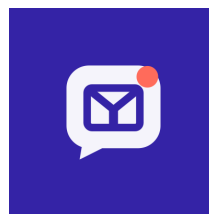

In the wild

Tailwind setup

Two versions are included. Tailwind v4 uses tailwind/taddar.css (CSS-first @theme). Tailwind v3 uses tailwind/tailwind.config.js plus tokens/tokens.css. Both were compiled and checked.

TAILWIND V4 · APP.CSS

```
@import "../taddar.css";

/* that's it. taddar.css imports tailwindcss,
   the fonts, the theme and dark mode. */
```

TAILWIND V3 · GLOBALS.CSS

```
@import "../tokens.css";
@tailwind base;
@tailwind components;
@tailwind utilities;
```

EXAMPLE

```
<section class="bg-surface py-24">
  <span class="badge-highlight">New</span>
  <h1 class="text-h1 text-foreground">
    Cold email, done right.</h1>
  <p class="text-body-lg text-muted-foreground">
    Warmed domains. Real replies.</p>
  <a class="btn-primary">Book a call</a>
  <a class="btn-signal">See pricing</a>
</section>
```
